*Pop up* untuk web biasanya digunakan untuk menjelaskan suatu gambar atau link. *Pop up* ini berguna sebagai alternatif apabila pengunjung tidak mengaktifkan gambar sehingga nantinya dengan adanya *pop up* ini pengunjung tidak merasa bingung dalam menjelajah web. Selain hal diatas, *pop up* ini juga berfungsi untuk menjelaskan kemana sebenarnya arah suatu *link*. *Pop up* standar biasanya berbentuk box berwarna kuning muda dengan teks berwarna hitam. Pada tips kali ini kita mencoba membuat *pop up* alternatif dengan menggunakan javascript. Kelebihan *pop up* alternatif ini adalah kita dapat dengan bebas mengatur parameter-parameter dari *pop up* tersebut. Jadi dengan adanya *pop up* alternatif ini design web akan lebih fleksibel tanpa selalu harus menyesuaikan dengan komponen tertentu.

Gambar 1. *Pop up* alternatif

Gambar 2. *Pop up* standar

Oke, langsung saja kita mulai *step by step* membuat *pop up* ini :

1. Buka editor web semisal DreamWeaver, FrontPage, MozilaComposer, Notepad atau lainnya.
2. Buatlah halaman baru dan *copy paste*-kan kode dibawah ini lalu simpan dengan nama *popup.js* di folder Js :

```
var INARRAY=1;  
var CAPARRAY=2;  
var STICKY=3;  
var BACKGROUND=4;  
var NOCLOSE=5;  
var CAPTION=6;  
var LEFT=7;  
var RIGHT=8;  
var CENTER=9;
```

```
var OFFSETX=10;
var OFFSETY=11;
var FGColor=12;
var BGColor=13;
var TEXTColor=14;
var CAPColor=15;
var CLOSEColor=16;
var WIDTH=17;
var BORDER=18;
var STATUS=19;
var AUTOSTATUS=20;
var AUTOSTATUSCAP=21;
var HEIGHT=22;
var CLOSETEXT=23;
var SNAPX=24;
var SNAPY=25;
var FIXX=26;
var FIXY=27;
var FGBACKGROUND=28;
var BGBACKGROUND=29;
var PADX=30;// PADX2 out
var PADY=31;// PADY2 out
var FULLHTML=34;
var ABOVE=35;
var BELOW=36;
var CAPICON=37;
var TEXTFONT=38;
var CAPTIONFONT=39;
var CLOSEFONT=40;
var TEXTSIZE=41;
var CAPTIONSIZE=42;

Beberapa parameter yang menurut saya penting untuk diubah ditunjukkan dengan teks berwarna merah. Parameter tersebut meliputi warna *pop up*, jenis teks yang digunakan, ukuran teks dan gambar. Anda dapat mencoba parameter lain dengan mengubah nilainya.

3. Buka halaman web yang akan ditambahi *pop up*. Tambahkan kode berikut pada bagian `<body></body>` :

```
<DIV id=overDiv style="POSITION: absolute; VISIBILITY: hidden; Z-
INDEX:1000"></DIV>
<script language="javascript" type="text/javascript"
src="Js/popup.js"></script>
```

Fungsi dari kode diatas adalah untuk memanggil fungsi-fungsi Javascript dari file popup.js

4. Buat sebuah *link* dari gambar. Perhatikan kode html proyek jika ditambahi sebuah *link*. Setidaknya akan terbentuk kode dengan model sebagai berikut:

```
<a href="halamanyangdituju.htm"></a>
```

5. Tambahkan kode dengan teks warna merah berikut pada `<a>`, sehingga kode akhir menjadi :

```
<a href="halamanyangdituju.htm" onmouseout=nd(); onmouseover="return overlib('Ini
adalah pop up alternatif !', RIGHT, CAPTION, ' &raquo;');"></a>
```

Tes halaman web yang telah dibuat. Jika anda tidak melakukan kesalahan maka pada posisi mouseover akan muncul *pop up* dengan tulisan "Ini adalah *pop up* alternatif !" dan posisinya disebelah kanan dari *cursor mouse*. Apabila anda menginginkan posisi *pop up* berada di

sebelah kiri *mouse*, anda tinggal mengubah **RIGHT** menjadi **LEFT**. Untuk parameter lain silahkan anda coba sendiri.

Semoga tips ini bermanfaat bagi anda. Penulis telah mencoba tips ini pada Internet Explorer 6 SP1 dan Opera 7.23 with Java. Kedua *browser* tersebut dapat menjalankan tips ini dengan baik. Komentar dan saran harap dikirimkan ke [admin@ahmadimron.com](mailto:admin@ahmadimron.com)

This article is dedicated to my loving and supportive friend *Amberdawn*.
